RE: INSTALLATION OF SOLAR WATER HEATING SYSTEM AT LIPELA 1

Hey, This is to confirm that the solar water heating system is now fully installed and operational. All the three buildings of Lipela 1 are now connected to the system.

The kids and staff can now bath in hot water. The clothes washing is now comfortable with warm water. The cooking has also been made easier due to availability of Hot water all the time. Lipela management will benefit from the system by reduction of cost of firewood.

This is good progress and we thank the sponsors of this project immensely.

If funds are available please extend the same gesture to kids in Lipela 2.

All the best from us.

Francis M. Ndirangu
